

Cyberbullying

Project of Mattia Salis and Carlotta Paratore 1BL

What is cyberbullying?

- Cyberbullying is a form of bullying conducted through telematic tools, such as through the computer

In acts of cyberbullying the victim can suffer offenses, harassment, blackmail for a shorter or longer period by one or more people

How can cyberbullying be fought?

The victim and parents can choose the administrative route to deal with cyberbullying. Instead of filing a complaint, the facts are exposed to the public security authority by making a request for a warning against the perpetrator of the cyberbullying act, but this can be done if he is over 14 years old.

The End!

We hope you enjoyed it and thanks for your attention
