

# THE CYBER-BULLYING

WHAT'S THE CYBER-BULLYING?

THE CYBER-BULLYING IS A FORM OF BULLYING  
WHERE THE VICTIM GETS HATED AND OFFENDED  
THROUGH SOCIAL MEDIAS/NETWORKS

# THE CYBER-BULLYING

In cyber-bullying the victim gets repeatedly tormented and offended.

Bullies target someone they see as a weak person, outside and inside, and they make fun of him.

Cyber-bullying can cause anxiety and severe stress, however there are people who stand up for those victims and helps them.

# CYBER-BULLYING CAN BE FOUND IN THE MOST POPULAR SOCIAL MEDIAS IN THE WORLD, IN THE LEAST FAMOUS TOO:

• Instagram 

• Facebook 

• Twitter 

• Snapchat 

• Youtube 

• Whatsapp 

**And many others...**

# ***THERE ARE MANY FORMS OF CYBER-BULLYING:***

- **FLAMING**: sending offensive messages to create online quarrels
- **CYBERSTALKING**: sending threat messages to the victim
- **DENIGRATION**: post gossips and (false) chats to damage the victim's reputation
- **OUTING**: posting private information of the victim
- **POSTING EMBARRASSING PHOTOS/VIDEOS**: Posting offensive or embarrassing photos of the victim without his permission

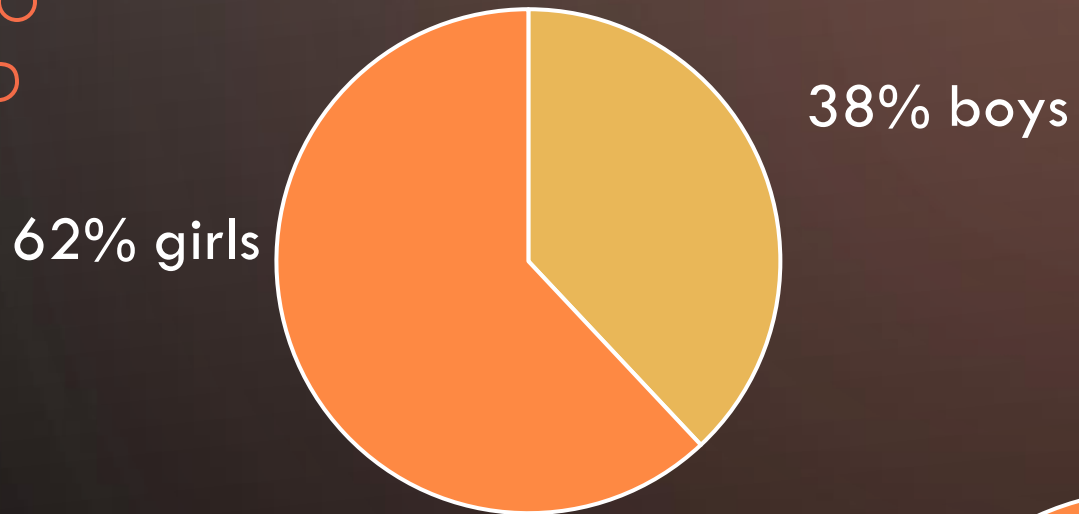

Victims get bullied in the social medias, but the victims and the bullies often frequent the same places, like schools, for example.

Bullies feel safe because they target and offend people through a screen. Most of them also use anonymous names to don't get recognized when they offend someone.
